Michigan; seats held by Debbie Stabenow since January 3rd, 2001 and Gary C. Peters since January 6th, 2015

Map shows Michigan with number of regulated facilities per program.
**INTRODUCTION**

**Why Report Cards on compliance with and enforcement of Environmental Laws?**

The Environmental Protection Agency (EPA) is charged by Congress to enforce laws that protect people from air pollution, water pollution and hazardous waste. **Without effective enforcement, these laws are meaningless.** Based on data from EPA's Enforcement and Compliance History Online (ECHO) database this report card reviews violations, inspections and enforcement actions under three laws: Clean Air Act (CAA), Clean Water Act (CWA) and Resource Conservation and Recovery Act (RCRA) for this Congressional District or State since 2001. Report cards like this one are becoming available on the [EEW website](http://www.example.com) for all House Representatives and Senators. The EEW website also has a summary analysis of enforcement trends and data issues for all geographies covered by the House Energy and Commerce and Senate Environment and Public Works Committees. The report cards contain data from both state environmental agencies and the EPA. If the states are enforcing the above laws, it is because the EPA has delegated that authority to them. The EPA must ensure that states are doing their job. Congress must ensure that the EPA is doing its job. And the public must have accurate data from states and the EPA in order to understand if national environmental laws are being properly enforced. For the first time, EEW Congressional Report Cards give members of Congress and their constituents the chance to evaluate whether the EPA is fulfilling its mandate in their district. Congress can strengthen EPA enforcement by increasing its budget, passing more effective laws, requiring better data collection, and holding the EPA accountable when it fails to protect people.

**What is a “regulated facility”?**

A regulated facility in this report is a facility that reports air or water emissions under the Clean Air Act or Clean Water Act, or a facility that generates, transports, or disposes of hazardous waste under the Resource Conservation and Recovery Act. Regulated facilities can be large-scale e.g. oil refineries, or small-scale e.g. dry cleaners.
This graph shows how this district compares by its percentile with other U.S. congressional districts on three metrics: number of violations, number of violations per inspection, and number of violations per enforcement action. These metrics are used on the data from each of the three EPA programs—the Clean Water Act (CWA), the Clean Air Act (CAA) and the Resource Conservation and Recovery Act (RCRA). The data used is for the past five years, 2017 through 2021.

As an example, a Violations ranking of 49 for CWA means that this state has more violations per facility than 49 of all states in the United States. From these rankings we can assign letter grades to states—the top 10, those states with more violations than 80% of all states, would get an F; the states scoring between 30 and 40 get a D; between 20 and 30 get a C; between 10 and 20 get a B; and the 10 with least violations per facility get an A. With that grading scheme, Michigan is given the following grades:

- CAA Violations per Facility - F
- CAA Violations per Inspection - C
- CAA Violations per Enforcement - A
- CWA Violations per Facility - F
- CWA Violations per Inspection - C
- CWA Violations per Enforcement - C
- RCRA Violations per Facility - D
- RCRA Violations per Inspection - C
- RCRA Violations per Enforcement - D

Rationale for grading using these metrics:

- More violations per active facility are worse.
- More inspections mean more problems will be found, which is good. Dividing violations by inspections indicates the strength of the inspecting
- More enforcements when violations are found disincentivizes violating. Dividing violations by enforcements indicates the willingness to call fouls.
*see data limitations page for metric calculations
These graphs show the changes in numbers of inspections, violations and enforcement actions per facility for the U.S., the state of MI, under the Clean Water Act (CWA)*.

*(The current number of active facilities is used for the calculations for all graphs, as the historical data for facility counts was not available. The graphs therefore give trends rather than faithful statistics.)*

**Clean Water Act Violations**: Violations during the four Trump administration years were much worse than the average over the previous 16 years, representing a **202% increase** in violations.

**Enforcement Actions under Clean Air Act, Clean Water Act, and the Resource Conservation and Recovery Act**: worse than the average over the previous 16 years, representing a **18% decrease** in enforcement actions.

When comparing the graphs, note that the vertical axes may have considerably different scales.

*see data limitations page for metric calculations*
HIGHLIGHTS FOR MICHIGAN

- Comparing the first 3 years of the Obama administration to the first 3 years of the Trump administration, there has been a 3% decrease in inspections, 33% increase in fines, and a 14% decrease in enforcement actions.

- Under the Clean Water Act, the law whose regulation is best documented by available EPA data, 2128 facilities, representing 46% of all regulated facilities in MI, were in violation for at least 9 months of the last 3 years.

The reliability of data in figures throughout this report is indicated by the figure subtitle and degree of transparency. See the data limitations page (Page 10) to view the transparency-coding table and access state and congressional district data [here](#).
These two charts show how inspections and violations in this state compare to the national average per 1000 facilities in 2022. We use data from 2022 as it was the most recent full year and the ECHO database only reports currently active facilities. To enable comparison across locations with a differing number of active facilities, we standardize the comparison to a value per 1000 facilities, proportionally adjusting the data if there are more or less than 1000 facilities in a district or state.

For access to the Jupyter Notebooks which pull data from ECHO at the state and congressional district level, click here. For national data, click here. The reliability of data in figures throughout this report is indicated by the figure subtitle and degree of transparency. Figure transparency illustrates data reliability: the more transparent, the more uncertain the data. See the data limitations page (Page 10) to view the transparency-coding table.
These figures show the ten facilities in this state with the worst history of environmental compliance based on their number of noncompliant quarters in the past 3 years (not necessarily consecutive).

**ECHO reports for facilities:**
- GREDE LLC - IRON MOUNTAIN
- DTE ELECTRIC COMPANY - MONROE
- SOLUTIA PLANT
- VOSS INDUSTRIES-VOSS TAYLOR DI
- BASF CORP
- AISIN TECHNICAL CENTER OF AMER
- CONSUMERS ENERGY - WHITE PIGEO
- TOEFCO ENGINEERED COATING SYST
- GRAPHIC PACKAGING INTERNATIONAL
- AXIUM GROUP LLC
54 additional facilities with 12 quarters in violation

**ECHO reports for facilities:**
- JCS INCORPORATED
- TARGET STORE T0365
- MOLDED PLASTIC INDUSTRIES, INC
- PADNOS LOUIS IRON AND METAL CO
- CLEAN LITES
- COMPRESSOR ENGINEERING CORP
- PTI QUALITY CONTAINMENT SOLUTI
- PARK AVENUE CLEANERS
- POLAR ENVIRONMENTAL SERVICES
- L & M MACHINING & MFG INC
186 additional facilities with 12 quarters in violation

**ECHO reports for facilities:**
- CORDIA AT GRAND TRAVERSE COMM
- BOB SHINN FARMS - CAFO
- KENDOR STEEL RULE DIE INC
- DPR MFG & SVC
- EQUIVALENT BASE CO-10 MILE
- COE PRESS EQUIPMENT CORP
- JVIS USA LLC HARPER
- GEORGE W KUHN DR DIST CSO RTB
- FAB-JET SERVICES
- 259 additional facilities with 13 quarters in violation
The **Clean Air Act (CAA)** regulates air emissions from mobile sources, such as cars, and stationary sources, such as refineries and power plants. Please note, in this report we are only utilizing data from stationary air emission sources. For the CAA, violations are most commonly recognized via inspections. Infrequent inspection usually results in fewer identified violations. If CAA violations have decreased, make sure to check whether inspections have also decreased as recent cuts in inspections are likely related to drops in CAA violations. Unless thorough inspections are occurring regularly, fewer violations does not necessarily mean air quality has improved. [More info on CAA]

**There are 2886 facilities currently reporting under the CAA in this state.**

These figures show patterns of CAA inspections, violations, enforcement actions and fines in this state since 2001 based on available EPA data (see page 10). The bars are colored by president. Figure transparency illustrates data reliability: the more transparent, the more uncertain the data. Data on CAA violations is particularly unreliable as emissions are often not directly monitored but are estimates. Inspection, enforcement, and fine data can be unreliable because state reporting to ECHO may be incomplete. For access to the Jupyter Notebook which pulls data from ECHO at the state and congressional district level, click [here](#).
The Clean Water Act (CWA) establishes quality standards for surface waters. In this report, we focus on CWA's National Pollutant Discharge Elimination System (NPDES) which permits facilities to discharge certain kinds and amounts of pollutants. Unlike the CAA, under the CWA effluent (waste emissions) is directly measured and routinely reported electronically to ECHO. CWA violations are automatically triggered if data is not submitted and if contaminant levels in effluent exceed the permitted amount. Such CWA violations can lead to inspections. More info on CWA

There are 4602 facilities currently reporting under the CWA in this state.

These figures show patterns of Clean Water Act inspections, violations, enforcement actions and fines in this state since 2001 based on available EPA data (see page 10). The bars are colored by president. Figure transparency illustrates data reliability: the more transparent, the more uncertain the data. Data on CWA violations is particularly reliable as effluent violations are automatically reported to EPA. For access to the Jupyter Notebook which pulls data from ECHO at the state and congressional district level, click here.
The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from “cradle-to-grave”, regulating the generation, transportation, treatment, storage, and disposal of hazardous waste. Facilities self-report under RCRA, like the CAA, and violations are most often found after an inspection. If RCRA violations have decreased, make sure to check whether inspections have also decreased as recent cuts in inspections are likely related to drops in RCRA violations. More info on RCRA

There are 24688 facilities currently reporting under RCRA in this state.

These figures show patterns of RCRA inspections, violations, enforcement actions and fines in this state since 2001 based on available EPA data (see page 10). The bars are colored by president. Figure transparency illustrates data reliability: the more transparent, the more uncertain the data. Data on RCRA violations is particularly unreliable as violations are not necessarily directly measured. Inspection, enforcement, and fine data can be unreliable because state reporting to ECHO may be incomplete. For access to the Jupyter Notebooks which pull data from ECHO at the state and congressional district level, click here.
Debbie Stabenow (Democrat)

In office since January 3rd, 2001

Govtrack web page

This member of Congress serves on the following committees:

**Committee Name: Joint Committee on Taxation**

Jurisdiction: 
Committee web page

**Committee Name: Senate Committee on Agriculture, Nutrition, and Forestry**

Jurisdiction: The Senate Committee on Agriculture has legislative jurisdiction over agriculture, food, and nutrition.
Committee web page

Subcommittee: Commodities, Risk Management, and Trade, Rank: 7
Subcommittee: Conservation, Climate, Forestry, and Natural Resources, Rank: 7
Subcommittee: Food and Nutrition, Specialty Crops, Organics, and Research, Rank: 7
Subcommittee: Livestock, Dairy, Poultry, Local Food Systems, and Food Safety and Security, Rank: 7
Subcommittee: Rural Development and Energy, Rank: 7

**Committee Name: Senate Committee on Environment and Public Works**

Jurisdiction: The Senate Committee on Environment and Public Works has legislative jurisdiction on matters related to environmental protection, resource utilization and conservation, and public infrastructure.
Committee web page

Subcommittee: Clean Air, Climate, and Nuclear Safety, Rank: 6
Subcommittee: Fisheries, Water, and Wildlife, Rank: 5
Subcommittee: Transportation and Infrastructure, Rank: 6

**Committee Name: Senate Committee on Finance**

Jurisdiction: The Senate Committee on Finance has legislative jurisdiction on matters relating to taxation, debt, customs, foreign trade, and health programs under the Social Security Act such as Medicare, Medicaid, the Children's Health Insurance Program (CHIP), Temporary Assistance to Needy Families (TANF) and other health and human services programs financed by a specific tax or trust fund.
Committee web page

Subcommittee: Energy, Natural Resources, and Infrastructure, Rank: 1
Subcommittee: Health Care, Rank: 3
Subcommittee: International Trade, Customs, and Global Competitiveness, Rank: 3

**Committee Name: Senate Committee on the Budget**
Jurisdiction: The Senate Committee on the Budget is responsible for drafting a concurrent resolution on the budget for congressional action on spending, revenue, and debt-limit legislation. The Budget Resolution must be jointly agreed to by both the House and the Senate, but does not need to be signed by the President. The Committee is also responsible for enforcing the Budget Resolution by informing senators of violations to the budget, and by working with other committees, such as the Committee on Appropriations, to prevent potential violations. Committee web page
Legislator Information

Gary C. Peters (Democrat)

In office since January 6th, 2015

Govtrack web page

This member of Congress serves on the following committees:

**Committee Name: Senate Committee on Appropriations**

Jurisdiction: The Senate Committee on Appropriations is responsible for legislation allocating federal funds prior to expenditure from the treasury. Appropriations are generally limited to the levels set by the Budget Resolution drafted by the Senate Committee on the Budget. The Committee is also responsible for supplemental spending bills, which are sometimes needed in the middle of a fiscal year to compensate for emergency expenses. [Committee web page]

Subcommittee: Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, Rank: 7
Subcommittee: Commerce, Justice, Science, and Related Agencies, Rank: 9
Subcommittee: Homeland Security, Rank: 6
Subcommittee: Interior, Environment, and Related Agencies, Rank: 7
Subcommittee: Military Construction, Veterans Affairs, and Related Agencies, Rank: 9

**Committee Name: Senate Committee on Armed Services**

Jurisdiction: The Senate Committee on Armed Services has legislative jurisdiction over military and defense. [Committee web page]

Subcommittee: Airland, Rank: 4
Subcommittee: Cybersecurity, Rank: 3
Subcommittee: Emerging Threats and Capabilities, Rank: 4
Subcommittee: Seapower, Rank: 6

**Committee Name: Senate Committee on Commerce, Science, and Transportation**

Jurisdiction: The Senate Committee on Commerce, Science, and Transportation has legislative jurisdiction on matters related to science and technology, oceans policy, transportation, communications, and consumer affairs. [Committee web page]

Subcommittee: Communications, Media, and Broadband, Rank: 5
Subcommittee: Space and Science, Rank: 3
Subcommittee: Surface Transportation, Maritime, Freight, and Ports, Rank: 1

**Committee Name: Senate Committee on Homeland Security and Governmental Affairs**
Jurisdiction: The Senate Committee on Homeland Security and Governmental Affairs is the Senate's primary oversight committee with broad jurisdiction over government operations generally and the Department of Homeland Security in particular. Its primary responsibilities are to study the efficiency, economy, and effectiveness of all agencies and departments of the federal government; evaluate the effects of laws enacted to reorganize the legislative and executive branches of government; and study the intergovernmental relationships between the U.S. and states and municipalities, and between the U.S. and international organizations of which the U.S. is a member. Committee web page

Subcommittee: Permanent Subcommittee on Investigations, Rank: 6
Subcommittee: Emerging Threats and Spending Oversight, Rank: 5
Subcommittee: Government Operations and Border Management, Rank: 5
ABOUT THE EPA DATA ANALYZED IN THIS REPORT CARD AND ITS LIMITATIONS

The data in this report is from EPA's publicly-available ECHO database that compiles information from a number of distinct state and federal sources. However, poor reporting by states and inconsistent reporting schemes result in data gaps and inaccuracies. EPA lists numerous specific issues on its “Known Data Problems” page. In addition, EPA notes that data on inspections, violations, and enforcement actions prior to 2001 should be treated as incomplete and unreliable. For that reason, we have only tracked data back to 2001. In addition to many data entry errors – too numerous to list here – there are several major problems with ECHO:

- There is serious under-recording and under-reporting of CAA violations at the state level. Most CAA violations – perhaps 85% or more – do not make it into ECHO. Violation data is therefore inaccurate and misleading: states which report the fewest violations may be states whose recording and reporting of violations is actually the poorest.
- Although there is no specific information about the quality of data on RCRA violations, it is likely that this program, like the CAA, has serious reporting problems. Therefore, RCRA violations data should also be considered inaccurate and potentially misleading. The key difference between these and the CWA is that the CWA entails mandatory electronic self-reporting.
- ECHO does not record how many regulated facilities there were for programs in previous years. Therefore, we cannot calculate the number of inspections, enforcement actions, and violations per regulated facility before 2022.

**Data reliability coding**

In this report, we have divided data issues into three categories, using transparencies in graphs as well as subtitles to indicate data reliability and completeness. See the table below:

<table>
<thead>
<tr>
<th>Data Quality</th>
<th>Example</th>
<th>Opacity</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>CWA NPDES violations</td>
<td>100% (full color)</td>
<td>These data are relatively reliable because effluent levels are frequently directly measured. The data are mostly complete due to mandatory electronic reporting.</td>
</tr>
<tr>
<td>Medium</td>
<td>CWA, CAA, RCRA inspections; CAA, CWA, RCRA enforcement actions and penalties</td>
<td>60%</td>
<td>These data can be incomplete due to incomplete state reporting to ECHO.</td>
</tr>
<tr>
<td>Low</td>
<td>CAA and RCRA violations data</td>
<td>30%</td>
<td>These data are unreliable and potentially misleading because emissions may not be directly measured, there are few mandatory federal electronic reporting requirements, and there are large gaps in state reporting to ECHO.</td>
</tr>
</tbody>
</table>

**Notes on 2023 data**

We do not include data from 2023 because it is be strongly influenced by the EPA's decision to suspend, from March through August, pollution monitoring requirements for industries that claim to have been impacted by COVID-19. EDGI's report on this policy “More Permission to Pollute” found that, despite relatively few facilities claiming the COVID exemption, a much larger proportion of facilities are still failing to report environmental data.
HOW AND WHY EEW DEVELOPED THE METRICS IN THIS REPORT

Page 2: Trump Administration Grade

To enable direct comparison between changes in enforcement and violations since the Trump Administration took office, we calculate the percent change in Clean Water Act violations and enforcement actions per district or state between Trump’s first three years in office, and the historical average in each state from 2001 to 2016. We analyze data since 2001, as EPA is most confident in its own data since 2001. We analyze violations data just for the Clean Water Act because that data is the most complete due to routine digital reporting requirements. We analyze all forms of enforcement actions, informal and formal. All data is drawn from the ECHO database.

We describe rates to be “Much Worse” if the percent increase in violations or decrease in enforcement actions is greater than 100%, “Worse” if the percent change is between 0% and 100% percent and “the same” if there is no change.

We describe rates to be “Better” if violation rates decreased or enforcement rates increased by 0% to 100% and “Much Better” if rates of enforcement or compliance increased by more than 100%.

This District or State in comparison dot plot:

The dot plot shows the number of Clean Water Act violations in this state or district compared to all others in this Senate or House committee in 2022. We use Clean Water Act data as it is the most reliable and use 2022 as we have the most confidence about data per 1000 facilities in that year. We provide this metric as some states’ rates of violations and enforcement may not have changed because their performance is consistently poor or good.

Page 3: Highlights from this State

Trump and Obama Administration comparison: To enable comparison to a more recent administration we compare levels of inspection and enforcement in the first three years of the Obama administration to the first three years of the Trump administration. For these figures inspections and enforcement numbers for the CWA, CAA and RCRA are combined. We compare to only the first 3 years of each Administration’s term for parity.

Facilities in Violation (non-compliant facilities):

To highlight the problem of chronic and routine violations of major environmental laws, this bullet point provides data on the number of facilities in each Congressional District or state which have been out of compliance with environmental laws for 9 or more months in the past 3 years under the Clean Water Act.
HOW AND WHY EEW DEVELOPED THE METRICS IN THIS REPORT (CONTINUED)

Page 4: This State in Comparison

To generate a comparison across states, each of which has a different number of facilities, we look at the average number of violations, inspections and enforcement actions per 1000 facilities. In states where there are fewer than 1000 facilities this requires us to scale up their data.

Page 5: Recent Noncompliance in this State

To examine facilities with consistent records of noncompliance, we provide information on the 10 facilities with the most quarters of non-compliance under the CAA, CWA, and RCRA. Important notes here: These charts show the number of quarters of non-compliance, not exactly which quarters they were out of compliance. Non-compliance shown here may not be consecutive. Quarters can also be confusing: there are 4 quarters in a year, so 12 quarters equals 3 years of time. In some locations there may be more than 10 facilities out of compliance for all 12 quarters. We limit our figures to 10 facilities for space and clarity. A list of 20 facilities can be found in the Jupyter notebook for that district or state. Additionally, the x-axis for these figures displays a maximum of 12 quarters for the CAA and RCRA, but 13 for the CWA. Under the CWA, violations are reported automatically, so we have violations information for the first three quarters of 2020 for the CWA, and only the first two quarters of 2020 for CAA and RCRA.
ABOUT THE AUTHORS AND LINKS TO DATA

About EEW

Environmental Enforcement Watch (EEW) is a collaborative project across working groups of the Environmental Data and Governance Initiative (EDGI). The EEW project builds on EDGI's 2019 Sheep in the Closet Report that documents large declines in EPA enforcement of environmental laws. This project uses data from EPA's ECHO database, revealing how useful ECHO could be for communities to track pollution and EPA responses in their areas. However, it also reveals the inaccessibility of ECHO for non-specialists, and major omissions, errors, and confusions present in the data itself (see page 10). EEW aims to highlight gaps and inadequacies in the enforcement of environmental laws and to help investigate whether EPA is fulfilling its congressionally-mandated duty to enforce environmental laws. EEW's data analysis is conducted using open source and publicly available data using Jupyter Notebooks developed by EDGI members.

A full list of EEW members, including their roles in this project, can be found here.

About this Project

This EEW project aims to make EPA data more directly accessible to the public and their representatives. With the goal of reaching the Representatives and Senators who oversee the EPA, EEW has made report cards for the 76 Senators and House Representatives that sit on the House Energy & Commerce Committee and the Senate Environment & Public Works Committee, as these committees are responsible for EPA oversight. By providing a novel look at the chronic state of non-compliance in their states and districts, we hope to provide these key representatives with the information they need to evaluate the state of environmental law compliance and enforcement in their communities so they might more effectively hold EPA accountable.

About EDGI

EDGI is an international network of over 175 members from more than 80 different academic institutions and non-profits, comprised foremost by grassroots volunteer efforts. Since 2016, EDGI has served as a preeminent watchdog group for federal environmental data, generating international effort to duplicate and monitor repositories of public data that are vital to environmental health research and knowledge. EDGI's work has been widely acknowledged, leading to EDGI testifying before Congress on declines in EPA enforcement, and hundreds of mentions in leading national and international media such as The New York Times, The Washington Post, Vice News, and CNN. For more about our work, read our 2019 Annual Report and 2020 Annual Report. For more on EDGI see our website.
